

ABID ALI MUGHAL

Flutter Developer | Cross-Platform Mobile App Development

+92 324 0802723 | abidalimughal0324@gmail.com | linkedin.com/in/abid-ali-mughal | abidali0324.github.io | Faisalabad, Pakistan

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of professional experience building scalable, high-performance, cross-platform mobile applications for Android and iOS. Specialized in Firebase integration, REST APIs, state management (GetX, Riverpod, Provider, Bloc), and On-Device AI/ML integration. Track record of delivering 30+ production-level apps across Healthcare, EdTech, E-Commerce, Finance, and RCM/Medical Billing domains. Experienced in full development lifecycle from UI/UX implementation to Play Store and App Store deployment. Available for remote, freelance, and international contract opportunities.

TECHNICAL SKILLS

Languages:	Dart, Python, JavaScript, PHP
Mobile Dev:	Flutter, Android SDK, iOS Development, Cross-Platform Development
State Mgmt:	GetX, Riverpod, Provider, Bloc, setState
Backend:	Firebase (Auth, Firestore, Realtime DB, FCM, Storage), REST APIs, JSON, OAuth2, JWT
AI / ML:	On-Device AI/ML, TensorFlow Lite, ML Kit, Keras, Custom-Trained Models
Architecture:	Clean Architecture, Feature-Driven Development, SOLID Principles, MVC, MVVM
Healthcare IT:	eClinicalWorks (ECW), ICD-10, HCPCS, CPT Coding, HIPAA Compliance, RCM, Denial Mgmt
Tools:	VS Code, Android Studio, Git, GitHub, Postman, Figma, SQLite, Firebase Console
Deployment:	Google Play Store, Apple App Store, CI/CD, Automated Builds
APIs:	RESTful API Integration, JSON Parsing, CRUD Operations, Third-Party SDK Integration

WORK EXPERIENCE

Junior Flutter Developer December 2024 – Present

AJ CodeToCure Technologies | Faisalabad, Pakistan (On-site)

- Designed, developed, and maintained cross-platform Flutter applications for Android and iOS in a professional team environment with 30+ screen architectures
- Implemented scalable state management solutions using GetX, Riverpod, and Provider across multiple production-grade codebases
- Integrated Firebase Authentication, Firestore, Realtime Database, Cloud Messaging, and Storage for real-time, secure app functionality
- Consumed and integrated complex RESTful APIs with JSON parsing, OAuth2, JWT security, and error handling for seamless backend communication
- Implemented On-Device AI/ML models for real-time predictions, image recognition, and intelligent user interactions within Flutter apps
- Contributed to full development lifecycle — from UI/UX implementation to performance optimization and pre-deployment testing
- Collaborated with designers and backend engineers to deliver pixel-accurate, responsive UI/UX aligned with business requirements
- Supported Play Store and App Store deployment pipeline including build configuration, signing, and release management

Note: All client projects are under NDA — technical architecture and implementation details available on request.

Medical Billing Specialist December 2024 – Present

Clovis Pediatric Group | Remote (US-Based, California)

- Perform Insurance Eligibility and Benefits Verification for US-based pediatric patients using eClinicalWorks (ECW)
- Execute accurate Charge Entry with ICD-10, HCPCS, and CPT coding per payer guidelines and compliance standards

- Manage Claim Submissions to Medicare, Medicaid, and commercial insurance payers ensuring clean and timely claims
- Process Payment Posting by reviewing EOBs and ERAs; identify and resolve claim denials to optimize revenue flow
- Support end-to-end Revenue Cycle Management (RCM) operations maintaining HIPAA compliance throughout all workflows

KEY PROJECTS (30+ TOTAL — SELECTED HIGHLIGHTS)

ClaimGuard AI — B2B SaaS Denial Management Platform

AI-powered denial management platform for US healthcare clinics. Automated claim analysis, PHI-masked processing, multi-agent architecture for RCM optimization. Stack: Flutter, FastAPI, Firebase, AI/ML

NutriScan AI — Nutrition & Calorie Tracking App

AI-powered food scanner using Gemini API for real-time nutritional analysis, meal logging, BMI tracking, and calorie counting. Stack: Flutter, Firebase, Gemini API, AI/ML

Kids Learning App — On-Device AI/ML

Interactive EdTech app with custom-trained AI model detecting letters and numbers drawn by kids in real-time. Gamification, instant feedback, and secure data sessions. Stack: Flutter, Python, Keras, Firebase

Hospital ERP & HealthBridge System — Healthcare Management

Enterprise hospital management platform with patient registration, doctor scheduling, role-based access, secure authentication, and real-time Firebase backend. Stack: Flutter, Firebase Auth, Firestore

SchoolSync Master — School Management ERP

Full school ERP with Admin, Teacher, and Parent roles. Student registration, attendance, grades, timetable, push notifications. Stack: Flutter, Node.js, MongoDB, Firebase

E-Commerce App + Restaurant Suite + POS System — Commerce

Production-ready shopping app, multi-role restaurant management suite, and retail POS system with real-time order tracking, inventory, and payment processing. Stack: Flutter, Firebase, REST API, SQLite

Billing Brain + Expense Tracker + EarnFi — Finance Tools

Suite of financial apps including intelligent billing/invoicing with PDF generation, AI-powered receipt scanning for expense tracking, and earnings visualization dashboard. Stack: Flutter, Firebase, SQLite, AI/ML

EDUCATION

BS Software Engineering

Virtual University of Pakistan | CGPA: 2.74 / 4.0

2022 – 2026

CERTIFICATIONS & RECOGNITION

- Certificate of Appreciation – Performance & Contribution (AJ CodeToCure Technologies)
- PACI AI Course – Python, LLMs, RAG, and AI Agents (18-month program, in progress)

AVAILABILITY

Open to: Remote Freelance Projects | Long-Term International Contracts | Full-Time Remote Roles | Cross-Platform Mobile App Projects
